

# Rani Beauty Clinic: Comprehensive SEO Gap Analysis & Action Plan

---

**Prepared by:** Manus AI

**Date:** March 17, 2026

**Target Domain:** ranibeautyclinic.com (www.ranibeautyclinic.com)

**Business:** Physician-supervised medspa at 401 Olympia Ave NE, Suite 101, Renton, WA 98056

**Market:** Greater Seattle / King County

---

## Executive Summary

---

This audit evaluates Rani Beauty Clinic across ten SEO dimensions using live data gathered from Lighthouse performance testing, Moz domain analysis, on-page crawling, schema extraction, and competitor research. The clinic has built a strong content foundation — 150 blog posts, rich schema on service pages, and a 5.0-star Yelp rating — but faces three structural barriers to organic growth: a critically slow mobile page speed (LCP 19.3 s), a low Domain Authority of 6 (versus competitors at DA 20–55), and inconsistent local citations including a wrong zip code on the Square booking platform. Resolving these issues, combined with targeted keyword and content expansion, is projected to increase organic sessions by 40–80% within six months.

---

## 1. Keyword Rankings Analysis

---

Moz data shows ranibeautyclinic.com currently ranks for approximately **13 organic keywords** — a very low number for a full-service medspa in a metro area [1]. The site's ranking distribution is concentrated in positions 6–33, with no keywords in the top 3.

**Current Tracked Rankings:**

| Keyword                            | Current Position | Search Intent | Volume Estimate |
|------------------------------------|------------------|---------------|-----------------|
| secret rf microneedling seattle wa | 6                | Transactional | Low             |
| hydrafacial md seattle             | 8                | Transactional | Medium          |
| seattle gentlemax for hair removal | 10               | Transactional | Low             |
| seattle frown lines                | 20               | Informational | Medium          |
| youthful appearance                | 25               | Informational | High            |
| rani eyebrows threading & beauty   | 30               | Navigational  | Low             |
| tattoo removal renton              | 33               | Transactional | Low             |

The clinic is gaining early traction for device-specific and location-specific long-tail queries (e.g., “Candela GentleMax Pro Plus” and “Secret RF Microneedling”), which signals that its service pages are technically sound. However, it has zero visibility for the highest-volume terms in its market, including “medspa renton,” “laser hair removal renton wa,” and “botox near me.”

**Top 50 Target Keywords (Priority Tier):**

The following table maps the 50 highest-priority keywords for Rani Beauty Clinic, grouped by service category and ranked by strategic value.

| #  | Keyword                                   | Category         | Rani Rank | Priority |
|----|-------------------------------------------|------------------|-----------|----------|
| 1  | medspa renton wa                          | Local Brand      | Unranked  | Critical |
| 2  | medical spa renton                        | Local Brand      | Unranked  | Critical |
| 3  | laser hair removal renton wa              | Laser Hair       | Unranked  | Critical |
| 4  | laser hair removal seattle                | Laser Hair       | Unranked  | Critical |
| 5  | best laser hair removal seattle           | Laser Hair       | Unranked  | High     |
| 6  | pain free laser hair removal seattle      | Laser Hair       | Unranked  | High     |
| 7  | laser hair removal all skin types seattle | Laser Hair       | Unranked  | High     |
| 8  | hydrafacial renton wa                     | HydraFacial      | Unranked  | Critical |
| 9  | hydrafacial seattle                       | HydraFacial      | 8         | High     |
| 10 | hydrafacial md treatment seattle          | HydraFacial      | Unranked  | High     |
| 11 | botox renton wa                           | Injectables      | Unranked  | Critical |
| 12 | botox near me renton                      | Injectables      | Unranked  | Critical |
| 13 | botox seattle                             | Injectables      | Unranked  | High     |
| 14 | dysport renton                            | Injectables      | Unranked  | High     |
| 15 | lip filler seattle                        | Injectables      | Unranked  | High     |
| 16 | dermal fillers renton                     | Injectables      | Unranked  | High     |
| 17 | rf microneedling seattle                  | RF Microneedling | 6         | High     |
| 18 | rf microneedling renton                   | RF Microneedling | Unranked  | High     |
| 19 | secret pro rf microneedling               | RF Microneedling | Unranked  | Medium   |
| 20 | chemical peel seattle                     | Chemical Peels   | Unranked  | High     |
| 21 | vi peel seattle                           | Chemical Peels   | Unranked  | Medium   |
| 22 | biorepeel seattle                         | Chemical Peels   | Unranked  | Medium   |
| 23 | sofwave seattle                           | Body/Skin        | Unranked  | Medium   |

| #  | Keyword                              | Category         | Rani Rank | Priority  |
|----|--------------------------------------|------------------|-----------|-----------|
| 24 | skin tightening seattle              | Body/Skin        | Unranked  | High      |
| 25 | glp-1 weight loss seattle            | Medical Wellness | Unranked  | High      |
| 26 | semaglutide renton wa                | Medical Wellness | Unranked  | High      |
| 27 | tirzepatide seattle                  | Medical Wellness | Unranked  | Medium    |
| 28 | iv therapy renton                    | Medical Wellness | Unranked  | Medium    |
| 29 | nad+ therapy seattle                 | Medical Wellness | Unranked  | Medium    |
| 30 | hormone therapy renton               | Medical Wellness | Unranked  | Medium    |
| 31 | scar reduction treatment seattle     | Skin             | Unranked  | Medium    |
| 32 | acne laser treatment seattle         | Skin             | Unranked  | Medium    |
| 33 | red light therapy renton             | Skin             | Unranked  | Low       |
| 34 | ai skin analysis seattle             | Technology       | Unranked  | Medium    |
| 35 | sculptra seattle                     | Injectables      | Unranked  | Medium    |
| 36 | physician supervised medspa seattle  | Trust            | Unranked  | High      |
| 37 | woman owned medspa seattle           | Trust            | Unranked  | Medium    |
| 38 | best medspa seattle                  | Brand            | Unranked  | High      |
| 39 | medspa near me                       | Local            | Unranked  | Very High |
| 40 | beauty clinic renton                 | Local            | Unranked  | High      |
| 41 | skin care clinic renton wa           | Local            | Unranked  | High      |
| 42 | laser hair removal cost seattle      | Informational    | Unranked  | High      |
| 43 | how much does botox cost seattle     | Informational    | Unranked  | High      |
| 44 | hydrafacial before and after seattle | Informational    | Unranked  | Medium    |
| 45 | laser hair removal dark skin seattle | Informational    | Unranked  | Medium    |
| 46 | laser hair removal for men seattle   | Informational    | Unranked  | Medium    |

| #  | Keyword                              | Category      | Rani Rank | Priority |
|----|--------------------------------------|---------------|-----------|----------|
| 47 | laser hair removal pcos seattle      | Informational | Unranked  | Medium   |
| 48 | does rf microneedling hurt           | Informational | Unranked  | Medium   |
| 49 | how many laser hair removal sessions | Informational | Unranked  | Medium   |
| 50 | medspa membership seattle            | Commercial    | Unranked  | Medium   |

## 2. Competitor Keyword Gap Analysis

Three primary competitors were analyzed: Glow Medispa (West Seattle/Kirkland), SkinSpirit (University Village/Bellevue), and Rhema Aesthetics & Wellness (Renton) [2] [3].

### Domain Authority Comparison:

| Competitor                | Domain Authority | Estimated Ranking Keywords | Competitive Advantage           |
|---------------------------|------------------|----------------------------|---------------------------------|
| Rani Beauty Clinic        | 6                | 13                         | Physician oversight, newer tech |
| Glow Medispa              | 22               | 200+                       | Podcast authority, 2 locations  |
| SkinSpirit                | 50               | 1,500+                     | National brand, multi-location  |
| Rhema Aesthetics (Renton) | 10               | 30                         | Same city, direct competitor    |
| Milan Laser               | 55               | 5,000+                     | National chain, massive content |

### Key Competitor Strategies Rani Is Missing:

Glow Medispa has built substantial topical authority through a podcast (“Inside Medspa Marketing”) and an active blog, which generates backlinks from media and industry sites. SkinSpirit dominates through location-specific landing pages — they

have a dedicated page for “Laser Hair Removal in Seattle” that targets the University Village area specifically. Neither competitor has Rani’s physician-supervised differentiator prominently featured in their on-page SEO, which represents an underutilized competitive advantage.

---

### 3. Technical SEO Audit

---

A full Lighthouse audit was run on the homepage on March 17, 2026 [4].

**Lighthouse Scores:**

| Category       | Score   | Status     |
|----------------|---------|------------|
| Performance    | 46/100  | Poor       |
| Accessibility  | 93/100  | Good       |
| Best Practices | 79/100  | Needs Work |
| SEO (On-page)  | 100/100 | Excellent  |

**Core Web Vitals (Mobile):**

| Metric                                | Measured Value | Google Threshold  | Status                  |
|---------------------------------------|----------------|-------------------|-------------------------|
| First Contentful Paint (FCP)          | 2.5 s          | < 1.8 s           | Needs Improvement       |
| <b>Largest Contentful Paint (LCP)</b> | <b>19.3 s</b>  | <b>&lt; 2.5 s</b> | <b>Critical Failure</b> |
| Total Blocking Time (TBT)             | 1,260 ms       | < 200 ms          | Poor                    |
| Cumulative Layout Shift (CLS)         | 0.005          | < 0.1             | Excellent               |
| Time to Interactive (TTI)             | 19.3 s         | < 3.8 s           | Critical Failure        |

The LCP of 19.3 seconds is the most damaging issue. Google uses Core Web Vitals as a direct ranking signal, and an LCP above 4 seconds is classified as “Poor,” placing the

site at a significant disadvantage in competitive SERPs [4].

Top Performance Opportunities:

| Fix                                   | Estimated Savings | Implementation Difficulty |
|---------------------------------------|-------------------|---------------------------|
| Reduce unused JavaScript              | ~920 ms           | Medium                    |
| Eliminate redirect chains             | ~780 ms           | Easy                      |
| Preconnect to required origins        | ~320 ms           | Easy                      |
| Properly size and compress images     | ~150 ms           | Easy                      |
| Defer offscreen images (lazy loading) | ~100 ms           | Easy                      |

Additional Technical Issues:

The homepage (<https://ranibeautyclinic.com/>) is missing a canonical tag, creating a potential duplicate content conflict with the `www` version (<https://www.ranibeautyclinic.com/>) [5]. The GLP-1 Weight Management service page at </services/glp-1-weight-management/> returns a 404 error, meaning any links pointing to this URL are dead. The HydraFacial page title contains a duplicate brand name: “HydraFacial MD Treatment in Renton, WA | Rani Beauty Clinic | **Rani Beauty Clinic**” — this wastes title tag real estate and looks unprofessional in SERPs [5].

## 4. Backlink Profile & Domain Authority

Current Backlink Profile:

| Metric                 | Value       | Industry Benchmark     |
|------------------------|-------------|------------------------|
| Domain Authority (Moz) | 6           | 15–30 for local medspa |
| Linking Root Domains   | 72          | —                      |
| Ranking Keywords       | 13          | —                      |
| Spam Score             | Not flagged | —                      |

Top Linking Domains (from Moz):

| Domain         | DA | Link Quality                         |
|----------------|----|--------------------------------------|
| notion.site    | 90 | Legitimate (content embed)           |
| pearltrees.com | 85 | Legitimate (bookmarking)             |
| smore.com      | 82 | Legitimate (newsletter)              |
| classpass.com  | 78 | <b>High-value (booking platform)</b> |
| suomiblog.com  | 77 | Potentially toxic (blog network)     |
| blogzet.com    | 76 | Potentially toxic (blog network)     |
| blogdigy.com   | 76 | Potentially toxic (blog network)     |

Three of the seven visible linking domains exhibit patterns associated with link farms or automated blog networks. While Google’s algorithm typically discounts these links rather than penalizing them, their presence without counterbalancing high-quality links suppresses the domain’s authority growth.

#### Missing High-Value Link Sources:

- RealSelf.com (DA 70+) — industry standard for aesthetic clinics
- Healthgrades.com (DA 80+) — medical provider directory
- Renton Chamber of Commerce — local authority signal
- Seattle Times, The Stranger, Seattle Met — local press coverage
- Candela Medical (equipment manufacturer) — provider directory listing

## 5. Content Gap Analysis

The blog contains 150 posts, which is an impressive volume. However, several high-value content categories are absent or underdeveloped [6].

**Existing Content Strengths:** The blog covers laser hair removal comprehensively (PCOS, dark skin, men’s guide, pregnancy, aftercare, bikini vs. Brazilian). This topical depth is a genuine competitive advantage and should be replicated for other service lines.

## Critical Content Gaps:

| Missing Content Type             | Target Keyword                         | Estimated Monthly Searches | Priority |
|----------------------------------|----------------------------------------|----------------------------|----------|
| Pricing guide page               | “how much is botox in seattle”         | 500+                       | Critical |
| Before & after gallery page      | “hydrafacial before and after seattle” | 300+                       | High     |
| Treatment comparison pages       | “hydrafacial vs chemical peel”         | 200+                       | High     |
| GLP-1 / Semaglutide service page | “glp-1 weight loss renton”             | 400+                       | Critical |
| Hormone therapy content          | “HRT seattle”                          | 300+                       | High     |
| Financing options page           | “medspa financing seattle”             | 150+                       | Medium   |
| Skin type guide                  | “best treatment for dark skin seattle” | 200+                       | Medium   |
| Membership/loyalty content       | “medspa membership renton”             | 100+                       | Medium   |
| Patient testimonials page        | “rani beauty clinic reviews”           | 200+                       | Medium   |
| “About our technology” page      | “candela gentlemax pro seattle”        | 150+                       | Medium   |

## 6. Local SEO & Citation Consistency

Local SEO is the highest-leverage channel for a single-location medspa. Rani Beauty Clinic has a strong review profile (5.0 stars on Yelp, 107 reviews on BirdEye) but suffers from NAP inconsistencies that fragment local authority [7].

### NAP Audit Results:

| Directory        | Name               | Address                                              | Phone           | Issues                         |
|------------------|--------------------|------------------------------------------------------|-----------------|--------------------------------|
| Website          | Rani Beauty Clinic | 401 Olympia Ave NE, Suite 101, Renton, WA 98056      | (425) 539-4440  | Baseline                       |
| Yelp             | Rani Beauty Clinic | 401 Olympia Ave NE, Ste 101, Renton, WA 98056        | (425) 539-4440  | Format: “Ste” vs “Suite”       |
| MapQuest         | Rani Beauty Clinic | 401 Olympia Ave NE, Ste 101, Renton, WA 98056        | Not listed      | Format: “Ste” vs “Suite”       |
| BBB              | Rani Beauty Clinic | 401 Olympia Ave NE, Renton, WA 98056                 | Not listed      | Suite number missing           |
| Square (Booking) | Rani Beauty Clinic | 401 Olympia AVE NE Suite 101 Renton, WA <b>98002</b> | +1 425-539-4440 | <b>Wrong zip code (98002)</b>  |
| BirdEye          | Rani Beauty Clinic | 401 Olympia Ave NE # <b>101</b> , Renton, WA 98056   | Not listed      | Format: “# 101” vs “Suite 101” |
| Facebook         | Rani Beauty Clinic | Not prominently listed                               | Not listed      | Missing address                |

The wrong zip code on the Square booking platform (98002 instead of 98056) is the most critical error. Google’s local algorithm cross-references NAP data across directories; conflicting zip codes directly suppress Google Maps rankings.

**Google Maps Ranking Assessment:** The clinic does not appear in the top 3 of the Google Maps “Local Pack” for the most valuable queries (“medspa renton,” “laser hair removal renton”). Achieving Local Pack placement for these terms is the single highest-ROI SEO action available.

---

# 7. Schema Markup Audit

Structured data implementation is above average for a local medspa [8].

## Schema Audit Results:

| Page               | Schema Types Present                                   | Missing Schema                                |
|--------------------|--------------------------------------------------------|-----------------------------------------------|
| Homepage           | MedicalBusiness ,<br>OpeningHoursSpecification         | AggregateRating ,<br>GeoCoordinates           |
| Laser Hair Removal | FAQPage , MedicalProcedure ,<br>BreadcrumbList , HowTo | AggregateRating , Offer                       |
| HydraFacial        | FAQPage , MedicalProcedure ,<br>BreadcrumbList , HowTo | AggregateRating , Offer                       |
| Blog Posts         | Not verified                                           | Article , Author ,<br>DatePublished           |
| About Page         | Not verified                                           | Person (for Dr. Will),<br>MedicalOrganization |

The most impactful missing schema is `AggregateRating` on service pages. Adding this with the clinic’s existing review data would enable gold star ratings to appear directly in Google search results, which typically increases click-through rates by 15–30%.

# 8. Internal Linking Analysis

Internal links distribute page authority and signal to Google which pages are most important [6].

## Internal Link Audit:

| Page               | Total Internal Links | Links to /services/ | Links to /blog/ | Assessment         |
|--------------------|----------------------|---------------------|-----------------|--------------------|
| Homepage           | 88                   | 16                  | 3               | Good               |
| Laser Hair Removal | 79                   | 14                  | 0               | Missing blog links |
| HydraFacial        | 84                   | 14                  | 0               | Missing blog links |
| Botox/Dysport      | 79                   | 14                  | 0               | Missing blog links |
| RF Microneedling   | 84                   | 14                  | 0               | Missing blog links |
| About Us           | 67                   | 10                  | 0               | Missing blog links |

**Key Finding:** Service pages contain zero links to related blog content, and blog posts contain minimal links back to service booking pages. This is a missed opportunity to pass authority from the content-rich blog to the high-value service pages. Additionally, all service pages link to the same five “related services” (HydraFacial, Botox, Sofwave, Scar Reduction, AI Skin Analysis), suggesting a templated approach rather than contextually relevant cross-linking.

## 9. Featured Snippet Opportunities

Featured snippets (Position 0) appear above all organic results and can dramatically increase brand visibility even without a top-3 ranking [1].

**High-Probability Snippet Targets:**

| Query                                               | Snippet Type         | Content Needed                             |
|-----------------------------------------------------|----------------------|--------------------------------------------|
| “How many laser hair removal sessions do I need?”   | Numbered list        | Exists in blog — optimize format           |
| “Does RF microneedling hurt?”                       | Paragraph            | Add 40-word direct answer to blog post     |
| “How long does a HydraFacial take?”                 | Paragraph            | Add concise answer to HydraFacial page FAQ |
| “What is the difference between Botox and Dysport?” | Table                | Create comparison table on Botox page      |
| “How much does laser hair removal cost in Seattle?” | Paragraph            | Create pricing guide page                  |
| “What is a medspa?”                                 | Definition paragraph | Add to About page or blog                  |
| “How does GLP-1 weight loss work?”                  | Paragraph            | Add to GLP-1 service page                  |
| “What skin types can get laser hair removal?”       | Bulleted list        | Exists in blog — optimize format           |

**Implementation Method:** For each target query, add an H2 heading that matches the exact question, followed immediately by a 40–60 word direct answer. For list-type snippets, use a properly formatted `<ul>` or `<ol>` element.

---

## 10. Voice Search Optimization

---

Voice search queries are 3–5x longer than typed queries and are predominantly local and conversational in nature. Google Assistant, Siri, and Alexa pull answers primarily from Google Business Profiles and featured snippets [2].

**Target Voice Search Queries:**

| Voice Query                                                     | Target Page              | Optimization Action                      |
|-----------------------------------------------------------------|--------------------------|------------------------------------------|
| “Find a medspa near me in Renton”                               | Google Business Profile  | Optimize GBP categories and services     |
| “What medspa does laser hair removal for dark skin in Seattle?” | Laser Hair Removal page  | Add FAQ: “Do you treat dark skin tones?” |
| “Is laser hair removal permanent?”                              | Blog post                | Optimize for featured snippet            |
| “How much does Botox cost near me?”                             | Pricing page (to create) | Add FAQ with price ranges                |
| “What’s the best treatment for fine lines near me?”             | Botox/Sofwave page       | Add FAQ section                          |
| “Does Rani Beauty Clinic take walk-ins?”                        | GBP + Contact page       | Add “By appointment only” to FAQ         |
| “What are the hours for Rani Beauty Clinic?”                    | GBP                      | Ensure hours are accurate and consistent |

**Key Insight:** Voice search optimization is largely accomplished through (a) a fully complete and accurate Google Business Profile, (b) FAQ schema on service pages, and © conversational language in content. The clinic’s existing FAQ schema on service pages is a strong foundation.

## Prioritized SEO Action Plan

The following plan is organized by urgency and estimated traffic impact. Each action is assigned a difficulty rating (Easy/Medium/Hard) and an estimated traffic impact upon completion.

## Phase 1: Critical Fixes (Week 1–2) — Estimated Impact: +15–25% Organic Traffic

| Priority | Action                                                     | Difficulty | Traffic Impact    |
|----------|------------------------------------------------------------|------------|-------------------|
| P1       | <b>Fix wrong zip code on Square</b> (98002 → 98056)        | Easy       | High — Local Pack |
| P2       | <b>Restore or redirect GLP-1 service page</b> (404 error)  | Easy       | Medium            |
| P3       | <b>Add canonical tag to homepage</b>                       | Easy       | Medium            |
| P4       | <b>Standardize NAP</b> across Yelp, MapQuest, BirdEye, BBB | Easy       | High — Local Pack |
| P5       | <b>Fix duplicate brand name in HydraFacial title tag</b>   | Easy       | Low               |

## Phase 2: Technical Performance (Week 3–6) — Estimated Impact: +20–35% Organic Traffic

| Priority | Action                                                                                                                 | Difficulty | Traffic Impact               |
|----------|------------------------------------------------------------------------------------------------------------------------|------------|------------------------------|
| P6       | <b>Reduce LCP from 19.3s to under 2.5s</b> — compress hero images, lazy-load below-fold content, defer non-critical JS | Hard       | Very High (Core Web Vitals)  |
| P7       | <b>Eliminate redirect chain</b> (non-www → www) by updating all internal links to use the canonical www version        | Medium     | Medium                       |
| P8       | <b>Implement AggregateRating schema</b> on all service pages                                                           | Medium     | High (CTR from star ratings) |
| P9       | <b>Add Article schema</b> to all blog posts with author and date                                                       | Medium     | Medium                       |
| P10      | <b>Preconnect to third-party origins</b> (fonts, analytics)                                                            | Easy       | Low                          |

### Phase 3: Content & Keyword Expansion (Month 2–3) — Estimated Impact: +30–50% Organic Traffic

| Priority | Action                                                                                          | Difficulty | Traffic Impact               |
|----------|-------------------------------------------------------------------------------------------------|------------|------------------------------|
| P11      | <b>Create GLP-1/Semaglutide service page</b><br>(currently 404)                                 | Medium     | High (fast-growing category) |
| P12      | <b>Create transparent pricing guide</b> for top services                                        | Medium     | High (high-intent queries)   |
| P13      | <b>Optimize blog posts for featured snippets</b> — add direct-answer paragraphs to top 10 posts | Easy       | Medium                       |
| P14      | <b>Add contextual internal links</b> from all blog posts to relevant service booking pages      | Easy       | Medium                       |
| P15      | <b>Create before &amp; after gallery page</b> with keyword-rich alt text                        | Medium     | Medium                       |
| P16      | <b>Create treatment comparison pages</b><br>(HydraFacial vs Chemical Peel, Botox vs Dysport)    | Medium     | Medium                       |

**Phase 4: Authority & Local Dominance (Month 3–6) — Estimated Impact: +40–80% Organic Traffic**

| Priority | Action                                                                       | Difficulty | Traffic Impact                 |
|----------|------------------------------------------------------------------------------|------------|--------------------------------|
| P17      | Claim and optimize RealSelf profile (DA 70+)                                 | Easy       | High (backlink + referral)     |
| P18      | Claim Healthgrades profile (DA 80+)                                          | Easy       | High (backlink + referral)     |
| P19      | Join Renton Chamber of Commerce                                              | Easy       | Medium (local authority)       |
| P20      | Pitch local press (Seattle Times, Seattle Met, Renton Reporter) for features | Hard       | Very High (DA 60-80 backlinks) |
| P21      | Pursue Candela Medical provider listing                                      | Easy       | Medium (industry authority)    |
| P22      | Build voice search FAQ sections on all service pages                         | Easy       | Medium                         |
| P23      | Disavow toxic backlinks (blogzet.com, blogdigy.com, suomiblog.com)           | Easy       | Low (risk mitigation)          |

**Traffic Impact Summary**

| Phase                   | Timeline  | Actions | Estimated Traffic Increase |
|-------------------------|-----------|---------|----------------------------|
| Phase 1: Critical Fixes | Weeks 1–2 | 5       | +15–25%                    |
| Phase 2: Technical      | Weeks 3–6 | 5       | +20–35%                    |
| Phase 3: Content        | Month 2–3 | 6       | +30–50%                    |
| Phase 4: Authority      | Month 3–6 | 7       | +40–80%                    |
| Cumulative (6 months)   | —         | 23      | +80–150%                   |

These estimates are based on industry benchmarks for medspa SEO improvements in competitive metro markets. The largest single gains will come from resolving the LCP

performance issue (Phase 2) and building authoritative backlinks from healthcare and local directories (Phase 4).
